

Peace & Nature

Forest Revitalization on Mt.Rokko

Peace & Nature is working to revitalize the forest on Mt. Rokko as part of SDG's 17 goals mission to revive and harmonize with the natural environment. Our work area is near the peak of Mt. Kinchozan, adjacent to the hiking path connecting Hokura Shrine and Kazafukiiwa. During this workshop, participants will plant 6 types of trees, including wild cherry and Japanese maple, for a total of 30 trees as part of our forest revitalization work. Japanese and international participants will collaborate in this event. We welcome your participation.
